Manage Your Entire Employee Lifecycle in One Easy-to-Use Application

Harness the power of people.

The lifecycle of employees can make or break a business. EBSHR takes human resources from an administrative hassle and turns it into an engine capable of driving your company forward. Use EBSHR to analyze details on every aspect of your organization structure and regain control of your critical business processes, streamlining them to free up critical resources that allow your company to stay competitive. With a single cloud-based database, ESBHR allows you to build profiles for every position in your company—from the boardroom to the washroom—defining duties, competencies, pay ranges and much more. Collect and analyze date to make wise investments by finding the right person the first time to reduce the cost of recruitment. Create succession plans instantly, track employees who may be at risk of leaving and manage headcounts across the organization against defined budgets.

Human powered. Results driven.

Are you ready for the power of human-resource management, payroll and tax filing, assistance, and training programs all in one easy-to-use database? EBSHR helps you harness your workforce to achieve goals like growth, compliance and profitability. Human resources should be about the people, not the paperwork.

Find out why we say EBSHR is the most modern, cost-effective and easy-to-use integrated HRMS system on the market.
