

InfinityHR Professional Services

Maximize InfinityHR using proven best practices and an experienced team!

Whether you are looking for additional help for your next Open Enrollment or creating new workflows to initiate new efficiencies, you now have access to the deep expertise of our Product Consultants. Our extensive experience and know-how enables us to bring industry best practices to your organization and drive measurable business results.

You can leverage the capabilities of our subject matter experts at any stage of your InfinityHR lifecycle. Our portfolio is designed to allow you to engage us for a specific project need or as an end-to-end offering for complete oversight.

Professional services we offer:

SYSTEM CONFIGURATION & DESIGN

InfinityHR provides system configuration and design services such as system reviews/audits, assistance with Open Enrollment deployments, monthly benefit reconciliation and more.

DATA CONVERSION & INTEGRATION SERVICES

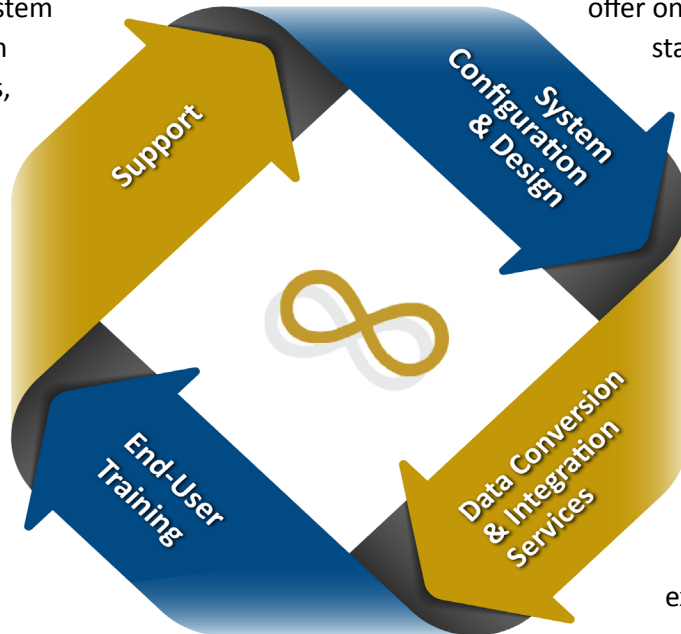

We can help with data services, such as migration from third-party systems, end-to-end exports and custom ad-hoc reports and analysis.

END-USER TRAINING

Let InfinityHR handle your end-user training needs. We offer on-site or Web meetings to empower stakeholders in your organization and provide them with the keys to success. Our personalized training sessions are designed to be relevant by role within your business.

SUPPORT

InfinityHR's product consultants provide functional and technical support for all of our modules. From Time & Labor Management to Workflows to Benefits Administration, we have the expertise you need.

Whether you need support in system audits, data services or end-user training, at InfinityHR we are your partner and not just your software provider.
