

Time and Labor Management

InfinityHR's Time and Labor Management feature allows your employees to enter their time and managers to approve it through the Employee Portal. InfinityHR then electronically routes the data to your payroll provider.

Key Features

- ✓ Choose between "clock in/clock out" time tracking, or project-based "timesheet" reporting.
- ✓ Allows managers to quickly approve or deny employee time.
- ✓ "Clock in/clock out" allows managers see if their employees are currently clocked in or out, and provides their employees most recent time activity.
- ✓ Allows you to analyze time and attendance data across time or by a variety of other factors.
- ✓ Electronically exports time and attendance data to your payroll system.

Hardware Time Clock Integration

US10C-ID time clock is an innovative and versatile time clock which combines a highly durable, yet elegant casing with a variety of identification methods from bar code cards, magnetic stripe cards, RFID/proximity cards and/or fingerprints.

Time Clock Features:

Choice of Readers

Barcode, mag stripe, proximity or fingerprint

Communication

Installs easily on your network and supports both hard-wired TCP/IP and optional wireless connection

Display

3-inch color TFT screen for beautiful display of graphics, icons and photos

Capacity

Supports up to 5,000 fingerprint templates or 10,000 cards/badges

Bell/Alarm

Built-in scheduler can ring an external bell/alarm to signify the start and close of work shifts.

Optional WiFi Connectivity

Allows for easy and hassle-free installation over a wireless network

Keypad

Rugged 20-key keypad with four programmable function keys (clock in/out, break in/out, etc.)

SDK Available

For OEM customers and software developers
