

The Clear Choice for Total Training Management

Cyber Train is a web-based, role orientated training management system designed to manage employee training requirements, enrollments, and certifications, easily and accurately. This simple to use tool empowers supervisors, instructors and employees by making information regarding classes, course requirements, programs and certifications available via the web and not just through the HR department. This intuitive, highly automated, and powerful software is the perfect tracking solution to help ensure that your employees receive the training they need.

Cyber Train Features

- Import student information, training requirements and courses taken, as well as courses, code tables and credentials from other systems (i.e. Excel, HR or payroll)
- Message center – lists training requirements and reminders
- Manage all types of training (classroom, on-demand, document based, web meeting)
- Track costs associated with training and use reports to identify where costs can be reduced
- Implement training programs, consisting of multiple courses, and track student progress through to completion
- Track credentials (licensures, certifications, and memberships) and renewal reminders
- Ensure course pre-requisites are met prior to student enrolling in or completing the next course
- Assign training requirements based on job, organization level
- Create tests, class surveys, correspondence templates and process flows to meet your needs and policies
- Add training requirements, courses taken, programs, and credentials in mass or individually
- Manage and distribute course content and related materials like documents, presentations, recordings, etc
- Process course equivalencies and automatically update records as needed
- Built in report writer allows you to effectively manage your training programs and requirements

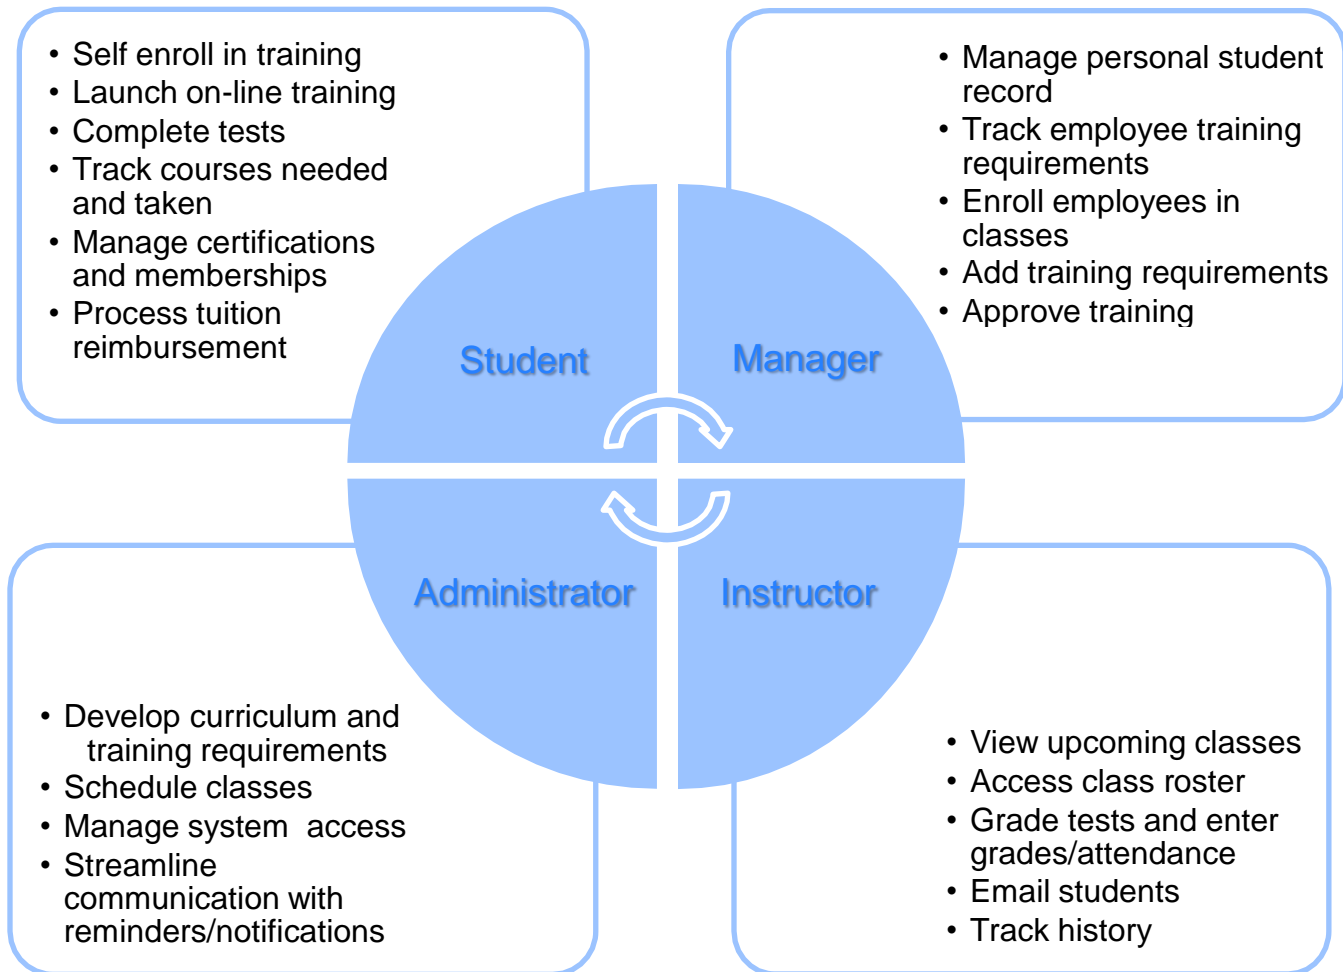

Cyber Train has everything you need to effectively manage your training programs

Ensure your employees receive the training they need on time, every time with Cyber Train. This in-house or hosted, role-oriented, robust self-service tool manages the entire training process and can be configured to meet client specific training processes.
